

# Thermostatic Floris

Automatic temperature adjusting

The Thermostatic Floris Valve is a more complex version of the simple Floris. It is able to adjust the room temperature automatically through the thermostat included in the handle. It has the similar functionality of a modern valve albeit of its vintage appearance. The distinct crocus flower pattern is a superb addition to your cast iron radiator.

This valve is a great choice for those who want to benefit from the comfort of having heat automatically adjusted while still be able to enjoy a vintage touch.
